

## CP Light RT - Electrical roll turner

### Lifting / transporting

- Material:** powder-coated aluminium/steel construction
- Loading capacity:** max. 300 kg
- Operation:** electric or electro-hydraulic
- Optional:** extended column, camera system USB-port ...

The CP Light is the ultimate counterbalance stacker with which you can work with maximum manoeuvrability even in the tightest work spaces. Thanks to the counterweight, this type of truck does not require typical front support legs. therefore as well as maximum loading for order picking and storage of goods despite storage possible obstacles on the floor. In addition, the absence of support legs on the ground floor allows the load to be approached up to the fork shoulder.

#### Applications:

- Foil industry
- Textile industry
- Paper industry
- Plastics technology
